

Dear members, dear customers
Dear Ladies and Gentlemen,

Corona has long dominated our professional and private lives. As a company and also as society, we have to face up to this comprehensive challenge. So far, we have succeeded in acting responsibly and in solidarity. Through tightened hygiene measures, home offices and the streamlining of processes, we want to protect ourselves against the transmission of infections within the company. These complex measures and the closure of nurseries and schools mean that the usual fast examination times cannot always be guaranteed.

Therefore we would like to ask for your understanding and patience, should the results of your sample analysis take longer than usual.

Nevertheless, we hope to be able to meet the justified expectations of our members, customers and employees. We hope that you will all come through the crisis in good health and largely unharmed.

Prof. Dr. Jörg Hilger

Managing director
