Tank milk analysis

Control of udder health about tank milk
- Annual contract -

You want an uncomplicated overview of the status quo of your herd?
Then, in addition to checking the quality of your raw milk from the tank milk sample, use regular PCR testing for mastitis-relevant pathogens including mycoplasma.

Advantages:

- ✓ **Continuous early warning system for mastitis relevant pathogens**
- ✓ **Early indication of developing microbiological stock problems**
- ✓ **Detection of mycoplasmas**
- ✓ **Stabilization of udder health and milk quality**
- ✓ **Regular control of the tank sample = monthly herd screening**
- ✓ **no additional effort regarding sampling, for suppliers to a Saxon dairy; for customers of other dairies free empties for self-delivery**

Costs: **Annual contract 280 €** (plus VAT)
